

Product License

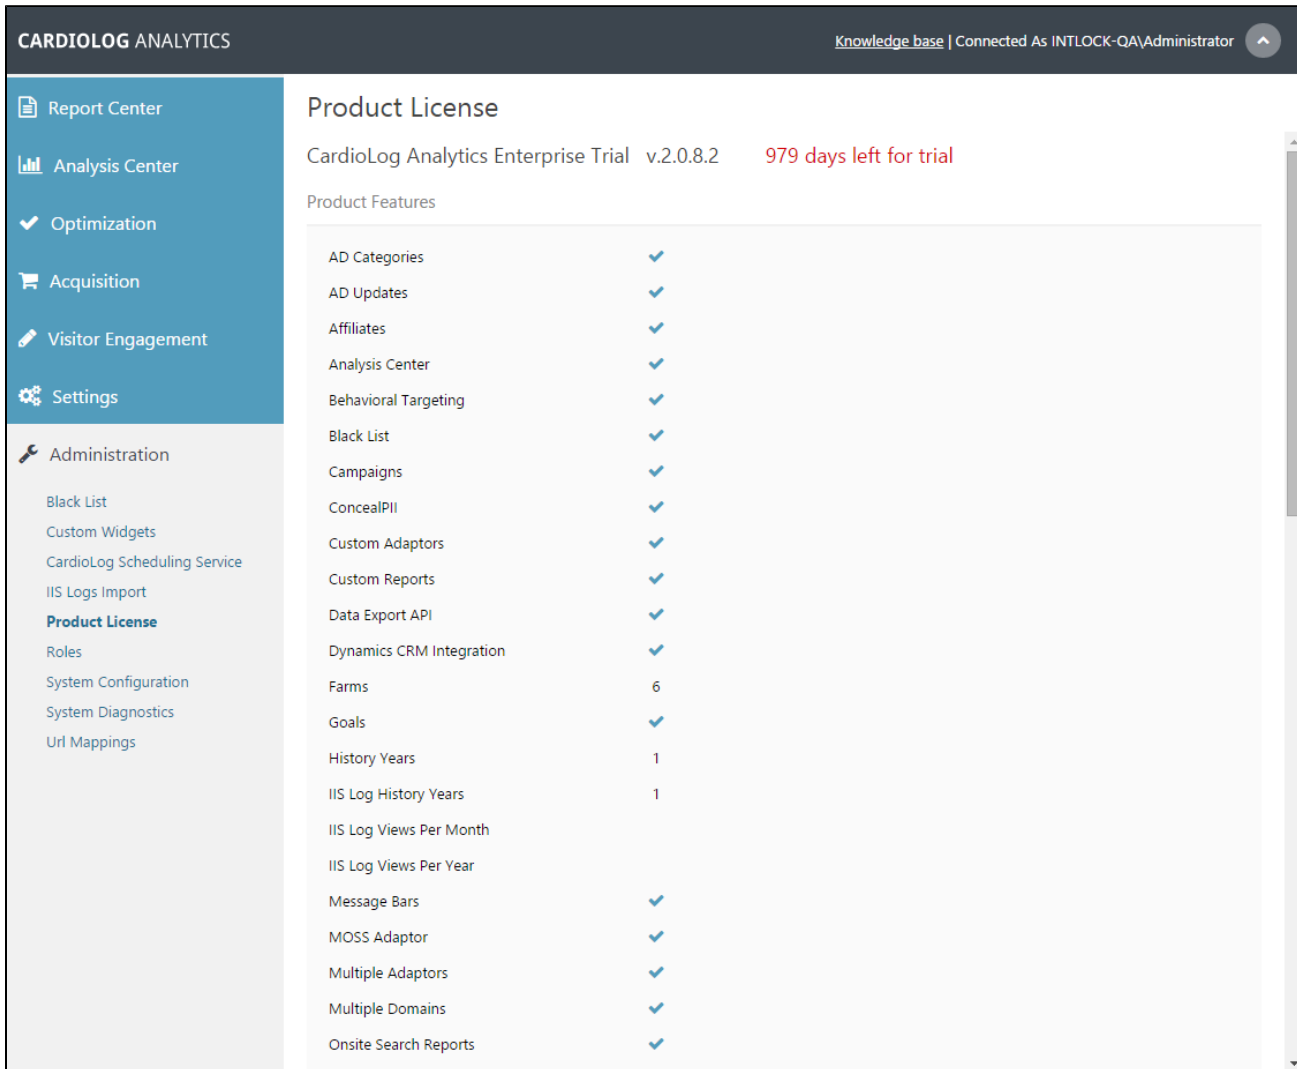

The Product License page provides information about your licensed product components, and enables the installation of new licenses.

Contents

- [Product Features](#)
- [Installing Purchased Product Features](#)

Product Features

1. In the **Administration** navigation pane, click **Product License**.
2. All available product features and limitations for CardioLog are listed in the **Product Features** table.

The screenshot shows the 'Product License' window in the CardioLog Analytics interface. The window title is 'CARDIOLOG ANALYTICS' and the user is connected as 'INTLOCK-QA\Administrator'. The main content area displays 'Product License' for 'CardioLog Analytics Enterprise Trial v.2.0.8.2' with '979 days left for trial'. Below this, a table lists various product features and their status.

Installing Purchased Product Features

Installing a Commercial License File

1. In the **Administration** navigation pane, click **Product License**.
2. Scroll down to Install a Commercial License File and select **Choose File**.
3. Open the Commercial License File using the Windows explorer.
4. Click **Install** after you have chosen the relevant file.

The screenshot shows a web interface titled "Install a Commercial License File". Below the title, there is a light gray box containing the text "License File:" followed by a "Choose File" button and the text "No file chosen". To the right of this box is a blue "Install" button.
