

URL Mappings

- How to Add a URL Mapping
- How to Edit a URL Mapping
- How to Delete a URL Mapping

The URL Mappings list defines the modifications that are made to URL addresses when collecting data from monitored environments. For example, URLs that include parameters describing a tracking link will be reported, and then saved without the parameters.

CardioLog ships with a list of default, uneditable URL mappings for SharePoint.

Pattern	Action	Continue
<input type="checkbox"/> asp\?PageView=Personal	aspx	1
<input type="checkbox"/> asp\?PageView=Shared	aspx	1
<input type="checkbox"/> _layouts\15\start\.aspx\#V	/	1
<input type="checkbox"/> (https?:\V)(.*?V)(.*)(SitePages\Topic\Flat\Management)\.aspx\?RootFolder=V)(.*V)(.*)(\&FolderCTID=.*)	\$(1)\$(2)\$(6)AllItems\$(5)\$(6) \$(7)	1
<input type="checkbox"/> asp\#.*	aspx	1
<input type="checkbox"/> (https?:\V[\^V]*)(.*topic\.aspx)(\?rootfolder=)[(\^&)*](.*)?	\$(1)\$(2)\$(3)\$(4)	1
<input type="checkbox"/> (KPIListViewPage.aspx)	AllItems.aspx	1
<input type="checkbox"/> (ManageA.aspx)	AllItems.aspx	1
<input type="checkbox"/> (MyItems.aspx active.aspx)	AllItems.aspx	1
<input type="checkbox"/> (MyUnconf.aspx MyCirc.aspx)	AllItems.aspx	1
<input type="checkbox"/> (overview.aspx summary.aspx)	AllItems.aspx	1
<input type="checkbox"/> (Posts/my-sub.aspx Posts/mod-view.aspx)	Posts/AllPosts.aspx	1
<input type="checkbox"/> (PublishedItems.aspx InvalidItems.aspx MyItems.aspx)	AllItems.aspx	1
<input type="checkbox"/> (Thumbnails.aspx SinglePict.aspx)	AllItems.aspx	1
<input type="checkbox"/> /Forms/view[0-9]*\.aspx.*	/Forms/AllItems.aspx	1
<input type="checkbox"/> /Forms/WebFldr\.aspx.*	/Forms/AllItems.aspx	1
<input type="checkbox"/> \.aspx?InitialTabId=.*	.aspx	1
<input type="checkbox"/> \.aspx?Mode=View.*	.aspx	1
<input type="checkbox"/> \Post\.aspx	/ViewPost.aspx	1
<input type="checkbox"/> advanced\.aspx.*	advanced.aspx	1

URL Mappings Main Window

How to Add a URL Mapping

1. In the Navigation pane, under Administration, click **URL Mappings**.

2. In the bottom left hand corner of the Central Area, click **Add**.
3. In the Add URL Mapping dialog, in the **Pattern** text box, enter the string you would like to be replaced. Use a [regular expression](#) format.
4. In the **Action** text box, enter the replacement string.
5. You can set the order of mappings in the **Order** drop down list.
6. To continue with additional mappings, click **Allow Continue**.
7. Click **Save**.

The image shows a dialog box titled "Add Url Mapping" with a close button (X) in the top right corner. The dialog contains the following elements:

- Pattern:** A text input field with a help icon (?) to its left.
- Action:** A text input field with a help icon (?) to its left.
- Order:** A dropdown menu with a help icon (?) to its left, currently showing the value "0".
- Allow Continue:** A checked checkbox with a help icon (?) to its right.
- Buttons:** "Cancel" and "Save" buttons located at the bottom right of the dialog.

Add URL Mapping dialog

8. To apply the URL mapping, you will need to restart IIS on the server where the CardioLog EventCollector web application resides. By default this is the CardioLog application server.

How to Edit a URL Mapping

1. In the Navigation pane, under Administration, click **URL Mappings**.
2. Find the URL you would like to edit in the central area and click on it.
3. Edit the details in the dialog and then click **Save**.
Note: The pattern cannot be modified.
