

SharePoint - Portal Resources

The Cardiolog SaaS Portal Resources reports include a collection of widgets for understanding how space and bandwidth are being used on your site, as well as highlighting content that may no longer be useful. Portal Resources includes the following report templates:

Portal Resources Overview

This report describes trends in the size and volume of content on your site.

Unused Content

Use this report to determine which files are either no longer relevant, or users may be unaware of.

Activity Distribution

This report details when and where your visitors access your site.
