

CardioLog SaaS Report Gallery

CardioLog Analytics SaaS arrives ready to go with many insightful reports for SharePoint and Office 365, including Yammer, Microsoft Teams, OneDrive and Exchange Online.

Anyone familiar with the on-premise version of CardioLog will feel right at home, and if you are using it for the first time you will be able to jump right into our intuitive reports in Microsoft Power BI.

The integration with Microsoft Power BI enables stakeholders to perform quick, on-demand slice & dice actions of their data through interactive reports, accessible from any device, anywhere, with flexibility to customize reports and visualize the data in any way they'd like.

The reports available out of the box include:

- [Reports for Office 365](#)
- [Reports for SharePoint](#)
- [Reports for Yammer](#)
- [Reports for Microsoft Teams](#)
- [Reports for OneDrive for Business](#)
- [Reports for Exchange Online](#)
