

Installed Components

CardioLog installs the following components:

1. The CardioLog database is located on a selected SQL Server 2008/2012/2014/2016
2. The **CardioLog Scheduling Service** Windows service.
3. The **CardioLog Diagnostics Service** Windows service.
4. *HKEY_LOCAL_MACHINE\SOFTWARE\Intlock\CardioLog* registry key (For 32-bit systems), or *HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Intlock\CardioLog* registry key (For 64-bit systems)
5. Local application files - C:\Program Files\Intlock\CardioLog.
6. IIS application pool ("CardioLogApplicationPool").
7. IIS web site ("CardioLog"). The default port number is 29999, unless already used by another application.
8. Start menu application shortcut to CardioLog.
9. The usage tracking code is deployed on the SharePoint servers. See [Configuring Usage Tracking and Reporting](#) for more information.
