

Onsite Search Reports

CardioLog ships with a built in set of Onsite Search reports ready to help you learn about when your visitors choose to search within your website, what they search for, how often they use the search function and more. Onsite Search may also be referred to as "internal search." Reports included are:

- Average Onsite Searches per Visit
- Failed Onsite Searches
- Onsite Failed Search Phrases
- Onsite Search Destination Pages
- Onsite Search Origin Pages
- Onsite Search Phrases
- Onsite Searches
- Onsite Searches - Failure Rate
- Onsite Searches - Failed vs. Successful
- Visits with Onsite Search

Add Onsite Search Widgets to Dashboard Selection
